

**Preliminary data****Bipolar IC**

| Type     | Ordering code | Package |
|----------|---------------|---------|
| TDA 5651 | Q67000-A2463  | DIP 22  |

The integrated circuit TDA 5651 includes the essential features for sound processing in video tape recorders

such as

- Amplification and adjustment of levels
- Setting of the required input and output impedances
- Switch-over between 4 signal sources
- Switch-over from recording to playback mode
- Muting pulse
- Adjustment of the switching signals (point 3-5) to bus-compatible control levels
- Automatic level control
- Setting of the recording and playback frequency response through external negative feedback

**Maximum ratings**

|  |                      | min | max           |     |
|--|----------------------|-----|---------------|-----|
| Input microphone amplifier                 | $V_M$                |     | $V_{REF}$     | V   |
| Input playback amplifier                   | $V_{I\text{pamp}}$   |     | $V_{REF}$     | V   |
| Output playback amplifier                  | $I_{Q\text{pamp}}$   | -5  |               | mA  |
| Output playback amplifier                  | $I_{Q\text{pamp}}$   |     | 6             | V   |
| Input AF signal                            | $V_{I\text{AF}}$     | 0   | $+V_S$        | V   |

| 14  | Line stop filter  |
| 15  | Frequency response, recording                             |
| 16  | Output recording (head)                                   |
| 17  | Logic input (switch-over)                                 |
| 18  | Logic input (switch-over)                                 |
| 19  | Input recording AV  |
| 20  | Time constant level control                               |
| 21  | Line stop filter (output level control)                   |
| 22  | Capacitive support C $V_{REF}$                            |

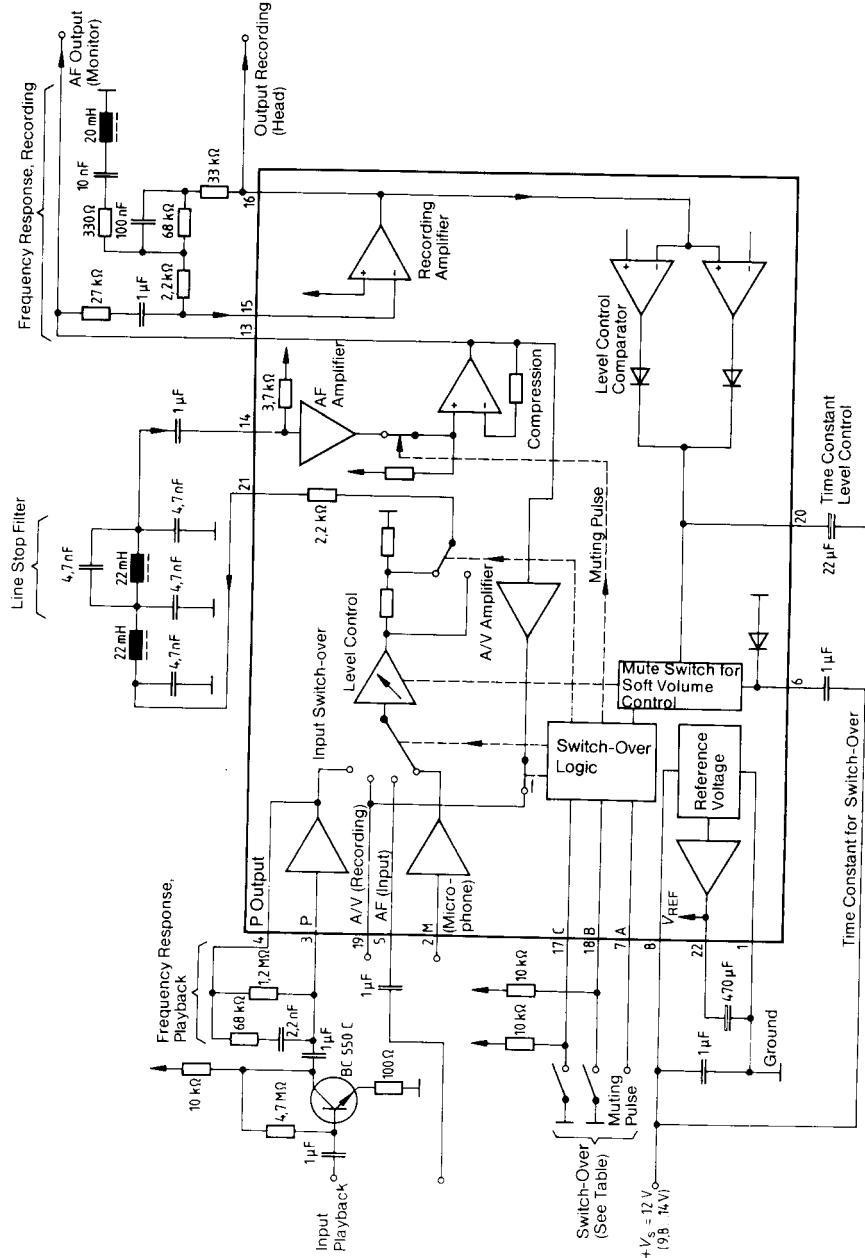

## Block diagram

## **Test and measurement circuit**

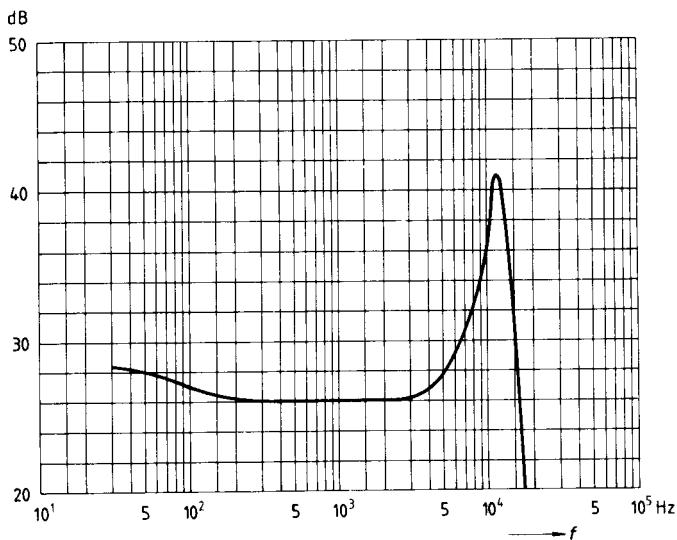

## Application circuit

## Frequency responses

**Recording mode (AF input – recording output)**  
realizable frequency response

**Playback mode (preamplifier input – monitor output)**  
realizable frequency response
